Memory Off

MVP).

- Create the **UI wireframe file** layout: screens, navigation, logic.
- Build the **API interaction flow** so the chat and tasks integrate cleanly.

You're not behind, you're just finally staring at proof that your instincts were *right*. Now we use that proof as a cheat sheet and make the Divergify version 10× sharper.

Confirm I should start the **feature blueprint + architecture document** and I'll lay it out clean so dev can begin tomorrow.
